

Table football ball-tracking

- Track the position of an orange ball with a Raspberry PI & camera
- Measure statistics by :
 - ball coordinates, goal events, ball possession, ball speed, ...
- Send out I2C of events so they can respond to these events
- Implement our Communication protocol

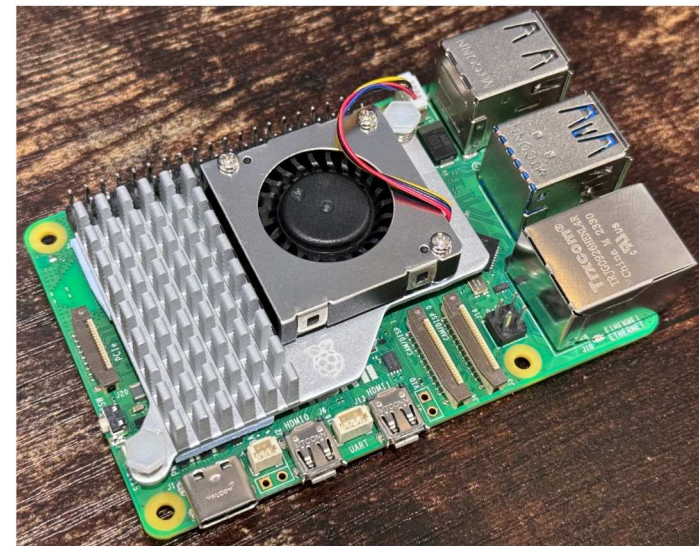

Table football ball-tracking

- I2C Protocol:
- X,Y coordinate, //2*16 Bytes
- Prev coordinate, //2*16 Bytes
- length, width of playing area // 2*16 Bytes
- Ball Speed, //float 4 Bytes
- Last possession, //1 Bytes
- Current score// 2*0,5 Bytes
